

Robert Morrow - his sequel

HW 3/31/77

Morrow phoned me a little after noon. He said it was on Tiny Hutton's suggestion, that Tiny said I know more about the subject than anyone else, etc.

His purpose was to check out some names in what he represents as some hot new stuff on the JFK assassination.

And were they Warren Commission witnesses?

What an expert who does not know that the Report ~~has~~ a list of witnesses!

I told him that as he talked I've be happy to check the witness list for him. Thus I told him that Fred Black and Bobby Baker were not witnesses. He was, he said, appreciative. Of my trouble, that is.

He appears now to be off on the kick that LBJ killed Kennedy.

I asked him if this Fred Black was the one of the prosecution, of the Nevada bugging case. He did not know. When he mentioned Bobby Baker it of course became clear.

He has some new records he says are authentic and were not in the WC files, only a few pages.

He says this all comes from the "Torbett papers." I told him there was much out of Texas that should instead have been flushed downward but it made no dent.

He also mentioned Walter Jenkins which is consistent with Cabal. (I do not have a copy but I recall Garrison's ecstasies over it.) It means nothing that Morrow did not mention Korth because he did make unspecific references to others.

This grows more monstrous daily.

Imagine a member of the staff of a Congressional committee supposed to be investigating these crimes making such a deferral after six months of the committee's ~~life~~ life."
